Jan David Fischbach

Abstract

A small demo embedding external content via xref. The content should be present in web and pdf exports, however it appears only in web.

```
x = np.linspace(0, 4 * np.pi, 100)
y = np.sin(x)
_ = plt.plot(x, y)
```

This is a figure caption for embedded content.

```
import numpy as np
import matplotlib.pyplot as plt
x = np.linspace(0, 8 * np.pi, 100)
y = np.sin(x)
_ = plt.plot(x, y)
```

A code-cell generating a sine plot
